Cardiovascular and Pulmonary Research: A Year in Review

Combined Sections Meeting 2014
Las Vegas, Nevada, February 3-6, 2014

Paul Ricard, PT, DPT, CCS
Johns Hopkins Hospital, Baltimore, MD

Lawrence Cahalin, PT, PhD, CCS
University of Miami, Miller School Of Medicine
Disclosures

• Paul Ricard has no disclosures regarding material presented in this course.

• Lawrence Cahalin has no disclosures regarding material presented in this course.
Speaker’s Note

• This year’s format will consist of each presenter speaking on a limited number of articles (bold/underlined in the following references) to allow for a more in depth presentation in areas that have been determined to be of most interest based on the literature review.

• Participants and authors are welcome to join in the conversation in the time allotted for each article.

• Please note that the following references are up to date as of November 2014. Articles from December, January, and February may be included in the final presentation and may supersede chosen articles to be discussed at the discretion of the presenters prior to the presentation.
Objectives

1. Report and interpret new literature surrounding the examination of or treatment for cardiovascular and pulmonary health conditions.

2. Compare their prior knowledge and practice to ideas and concept in current literature.

3. Discuss with peers the application and impact these studies may have on current and future practice.
Updates in Exercise/Physical Activity

Intensive Care

Intensive Care

COPD/Emphysema

COPD/Emphysema

COPD/Emphysema

Potluck Cardiac

Ventricular Assist Devices (VADs)
